

# Access Control System Validation Checklist

#### **System Overview & Configuration**

This section covers initial system setup, configuration reviews, and baseline settings verification.

System Software Version	
Enter a number	
System Manufacturer	
Write something	
System Architecture Description  Write something	
Access Control Method  Card Reader Biometric (Fingerprint) PIN Code Mobile Credential	

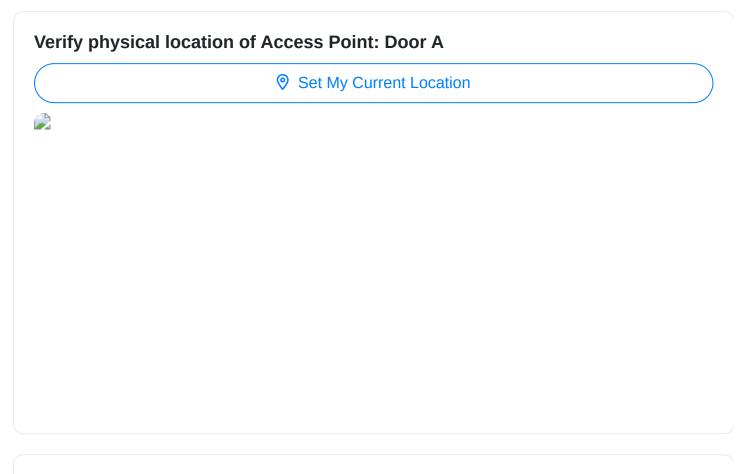

Enter date	
Number of Access Points Controlled	
Enter a number	
Network Connectivity	
Wired	
Wireless	
Both	
Describe any custom configurations applied to the	system.
Describe any custom configurations applied to the Write something	system.
Write something  Ser Management & Roles	
Write something  User Management & Roles  Discusses on the creation, modification, and deletion of use	
Write something  User Management & Roles  Discusses on the creation, modification, and deletion of use	
Write something  Ser Management & Roles  Decuses on the creation, modification, and deletion of use trees roles within the logistics environment.	
Write something  User Management & Roles  Decuses on the creation, modification, and deletion of use creases roles within the logistics environment.  Default User Role Assignment Method	

Maximum Number of Users per Role
Enter a number
Password Complexity Requirements Enforcement?
Yes
□ No
Partial/Configurable
Last User Role Review Date
Enter date
Justification for any deviations from Standard User Role Definitions
Write something
White democranigh
Which User Groups require Two-Factor Authentication?
Warehouse Staff
Supervisors
Receiving Personnel
Shipping Personnel  Management
Haar Aasaant Laskant Baliar C
User Account Lockout Policy?
<ul><li>None</li><li>☐ Fixed Number of Attempts</li></ul>
Configurable

# Account Deactivation Process Followed? Write something...

#### **Access Point Validation**

Evaluates the physical access points (doors, gates, loading docks) and their integration with the access control system.

**Access Point ID Number (e.g., engraved plate)** 

Enter a number...

Access Point Type (e.g., Door, Gate, Loading Dock)  Door Gate Loading Dock Other
Access Control Method (e.g., Card Reader, Biometric, Keypad)  Card Reader  Biometric (Fingerprint)  Keypad  Other
Number of Reader Heads Installed  Enter a number
Notes on Physical Security of Access Point (e.g., damage, obstructions)  Write something
Access Level Assigned (e.g., Employee, Visitor, Contractor)    Employee   Visitor   Contractor   Restricted
Observed Access Point Operation Time (e.g., opening/closing sequence)

## **Credential Management**

Covers card/fob issuance, PIN/biometric enrollment, and procedures for revocation/replacement of credentials.

Number of Active Credentials Issued  Enter a number	
Credential Issuance Process Followed?  Yes, documented procedure followed  No, deviations occurred	
Describe any deviations from the credential issuance procedure.  Write something	
Credential Types Supported?  Proximity Cards  Fobs  PIN Codes  Biometrics (Fingerprint)  Mobile Credentials	
Date of Last Credential Revocation Audit  Enter date	

Enter a number	
Describe the procedur	re for credential replacement (lost/damaged)
Write something	
Credential Revocation	Process Verified?
Yes, documented proce	edure followed
No, deviations occurred	d
Not Applicable	
Not Applicable	onortina

integrated Logistics System(s).  Write something  What is the latency (in seconds) for data synchronization between the Access Control System and the integrated Logistics System(s)?		
What is the latency (in seconds) for data synchronization between the Access Control System and the integrated Logistics System(s)?	· · · · · · · · · · · · · · · · · · ·	d the
Control System and the integrated Logistics System(s)?	Write something	
		e Access
	Enter a number	

Is data encryption used during transmission between the Access Control System and the integrated Logistics System(s)?  Yes No Partial
Describe the process for handling discrepancies or errors encountered during data integration.  Write something
Upload integration configuration files (if available).  L Upload File
Does the Access Control System restrict access to Logistics Systems based on user roles and permissions?  Yes Partial

### **Emergency & Override Procedures**

Tests the functionality of emergency access procedures, override capabilities, and fail-safe mechanisms.

Verify emergency unlock procedure documentation exists and is readily available.
Yes
□ No
□ N/A
Record response time (seconds) for emergency unlock request.
Enter a number
Test manual override functionality (e.g., key override).
Successful
Partial Success
Unsuccessful
Describe any issues encountered during manual override testing.
Write something
Confirm emergency power backup system tested.
Yes
No
□ N/A
Record timestamp of emergency override activation test.

Document steps taken to revert system to normal operation after emergency override.	,
Write something	
Were designated personnel properly trained on emergency override procedures?	
Yes	
No	
Partial	
Sacruity ( ) Villaguability ( ) accompany	
Security & Vulnerability Assessment	
lentifies potential vulnerabilities and assesses the system's resilience against nauthorized access or manipulation.	
naumonzeu access of manipulation.	
Brute-Force Lockout Time (Seconds)	
Enter a number	
Encryption Protocol Used (e.g., AES, TLS)	
AES	
TLS	
Other (Specify)	
Describe any observed vulnerabilities during penetration testing (if performe	ed).
Write something	

Which of the following potential vulnerabilities are mitigated by the current configuration? (Select all that apply)
Default Credentials
Unpatched Software
Physical Tampering of Readers
Lack of Two-Factor Authentication
SQL Injection
Firewall configuration: Is access to the Access Control System server(s) restricted to authorized personnel/systems only?  Yes  No No Applicable/Unknown
Upload Penetration Testing Report (if applicable)  L Upload File
Date of last vulnerability scan.  Enter date
Effici date
