

Concrete Delivery & Placement Checklist

 Show only Checklist

Display Style
Default 

Pre-Pour Planning & Preparation

Ensuring everything is ready *before* the concrete arrives.

Planned Pour Date

Enter date...

Estimated Pour Start Time

Enter time...

Estimated Concrete Volume (cubic yards)

Enter a number...

Excavation Status

- Complete
- In Progress
- Not Started

Formwork Status

- Complete
- In Progress
- Not Started

Specific Site Preparation Notes (Compaction, Ground Conditions, etc.)

Write something...

Utilities Located & Marked?

- Yes
- No
- Not Applicable

Site Preparation Photos (Optional)

 Upload File

Concrete Ordering & Mix Design

Verification of concrete specifications and delivery schedule.

Total Concrete Volume (cubic yards)

Enter a number...

Concrete Strength (psi) - Specified

- 2500
- 3000
- 3500
- 4000
- Other

Special Mix Requirements (e.g., admixtures, color)

Write something...

Slump (inches) - Specified

- 2
- 3
- 4
- 5
- Other

Scheduled Delivery Date

Scheduled Delivery Time (start window)

Concrete Supplier Name

Number of Concrete Trucks Required

Delivery & Hauling

Checking the concrete during transport and ensuring proper conditions.

Scheduled Delivery Time

Actual Delivery Time (minutes late/early)

Enter a number...

Concrete Supplier

- Supplier A
- Supplier B
- Supplier C
- Other (Specify)

Supplier Representative Name & Contact Info

Write something...

Hauler

- Hauler A
- Hauler B
- Hauler C
- Self-Haul

Concrete Temperature (°F/°C)

Enter a number...

Ambient Temperature (°F/°C)

Enter a number...

Weather Conditions

- Clear
- Cloudy
- Rain
- Snow
- Windy

Observations during Delivery (e.g., segregation, spillage)

Write something...

Placement & Consolidation

Ensuring correct placement techniques and proper consolidation.

Placement Method Verified (Pump, Bucket, Manual)

- Pump
- Bucket
- Manual

Concrete Slump (in)

Enter a number...

Vibration Equipment Used

- Internal Vibrator
- External Vibrator
- Both
- None

Vibration Spacing (ft)

Enter a number...

Over-Consolidation Observed?

- Yes
- No

Notes on Consolidation & Placement

Write something...

Finishing & Curing

Correct finishing methods and proper curing procedures for optimal strength and durability.

Finishing Method Used

- Screeding
- Floating
- Troweling
- Broom Finish
- Other (Specify in Long Text)

If 'Other' finishing method selected, please describe:

Write something...

Ambient Temperature (°C)

Enter a number...

Concrete Temperature (°C)

Enter a number...

Curing Method

- Water Ponding
- Wet Burlap
- Curing Compound
- Membrane Curing
- Other (Specify in Long Text)

If 'Other' curing method selected, please describe:

Write something...

Start of Curing Date

Enter date...

Curing Duration (Days)

Enter a number...

Moisture Content of Curing Material (if applicable)

- Saturated
- Damp
- Dry

Quality Control & Documentation

Records of all processes and quality checks performed.

Concrete Slump Test Result (in)

Air Content (%)

Temperature of Concrete (F)

Mix Design Verification Status

- Verified
- Not Verified
- N/A

Comments / Deviations from Plan

Pour Date

Enter date...

Time of Pour Start

Enter time...
