

Fire Suppression System - Manufacturing Equipment Checklist

System Overview & Identification

Verify system details and identify equipment locations. Includes system type, location identifiers, and responsible personnel.

Write something	
Fire Suppression System Type	
Wet Pipe	
Dry Pipe	
Pre-Action	
■ Deluge	
Clean Agent	
System Activation Pressure (PSI)

Responsible Department/Contact Person Facility Management Engineering Production Safety

Contact Phone Number	
Write something	
sual Inspection	
neral visual checks for any obvious signs of damage, tampering, or obstruct	ions.
Equipment Location (Refer to System Layout)	
Set My Current Location	
System Type (e.g., Wet, Dry, Pre-action)	
Write something	

Contact Person's Name

Visible Damage or Corrosion? None Minor Corrosion Moderate Corrosion Significant Corrosion Physical Damage
Ambient Temperature (°C) Enter a number
Obstructions Around Equipment (e.g., stored materials) Write something
Notes on Visual Condition Write something
System Status (Based on Visual Inspection) Normal Warning - Minor Issues Alarm - Immediate Action Required

Nozzle and Piping Inspection

Detailed inspection of sprinkler heads, piping, and related components for corrosion, leaks, and proper orientation.
