

Hazardous Waste Manifesting Workflow: Track & Comply With Work OS Platform

▶ Start

Start of the Workflow/Process.

☑ 1. Initiate Waste Manifest Generation

Task to start the waste documentation process for a specific job site.

📦 2. Retrieve Site & Waste Data

Gather necessary information (e.g., Waste Type, Quantity, Generator ID) from master data models.

✍️ 3. Update Waste Manifest Record

Update the central record with collection details and disposal certification.

🗃️ 4. Create New Waste Manifest Record

Populate the initial, unique record for the waste shipment.

☑ 5. Assign Manifest Review Task

Assign the newly created manifest to a supervisor for mandatory compliance review.

✉ **6. Notify Client Upon Manifest Submission**

Auto-send confirmation email to the client with the tracking number.

📦 **7. Validate Waste Codes and Limits**

Verify that all waste codes and associated regulatory limits are correctly entered.

⚖️ **8. Calculate Total Weight and Volume**

Sum up weights and volumes from multiple waste stream entries for accurate reporting.

📄 **9. Generate Final Waste Manifest Report**

Compile all necessary data into a printable, auditable compliance report.

📱 **10. Alert Driver of Urgent Manifest Issues**

Send immediate SMS notification to field staff about manifest discrepancies.

📝 **11. Log Disposal Location Confirmation**

Update the manifest with the final, audited disposal facility receipt details.

📅 **12. Schedule Follow-up Auditing Task**

Automatically schedule a follow-up task for necessary internal quality checks.

🏁 **End**

Start of the Workflow/Process.
