

Interior Painting Checklist

Pre-Painting Preparation

Tasks to be completed before any paint is applied, including surface assessment and protection.

Describe the Scope of Work

Write something...

Room Type

- Living Room
- Bedroom
- Bathroom
- Kitchen
- Hallway
- Other

Approximate Square Footage

Enter a number...

Identify Existing Condition (Check all that apply)

- New Construction
- Previously Painted
- Water Damage
- Mold/Mildew
- Cracks/Holes
- Wallpaper Removal Required

Note any unusual features or concerns

Write something...

Attach Photos of Existing Condition

 Upload File

Surface Preparation

Detailed steps for cleaning, repairing, and priming surfaces to ensure proper paint adhesion.

Describe existing surface condition (e.g., wallpaper, existing paint type, damage)

Write something...

Identify and address any surface defects:

- Cracks
- Holes
- Loose Paint/Wallpaper
- Mold/Mildew
- Stains (water, smoke, grease)
- None

If patching, amount of patching compound used (lbs/kg)

Enter a number...

Detail patching/repair procedures followed.

Write something...

Surface cleaning method used:

- TSP Wash
- Mild Detergent Wash
- Specialized Cleaner
- None (Surface Clean)

Number of coats of primer applied.

Enter a number...

Type of primer used:

- Oil-Based
- Latex/Water-Based
- Specialty Primer (e.g., stain-blocking)

Record any issues encountered during surface preparation and corrective actions taken.

Write something...

Upload photos of surface condition before and after preparation

 Upload File

Painting Application

Specific actions regarding applying the paint, including coats and techniques.

Number of Paint Coats Applied (per surface)

Enter a number...

Painting Technique Used (e.g., brushing, rolling, spraying)

- Brushing
- Rolling
- Spraying
- Other (Specify)

Notes on Application (e.g., any challenges, specific areas needing extra attention)

Write something...

Paint Drying Time (Manufacturer Recommendation)

- Less than 2 hours
- 2-4 hours
- 4-6 hours
- 6+ hours

Ambient Temperature During Painting (°C or °F)

Enter a number...

Surface Temperature During Painting (°C or °F)

Enter a number...

Details of any problem areas encountered during application and resolution.

Write something...

Post-Painting Cleanup & Inspection

Tasks to be completed after painting, including cleanup, touch-ups, and final inspection.

Check areas for drips and splatters.

- Walls
- Floors
- Trim
- Ceilings
- Furniture

Number of touch-up areas identified.

Enter a number...

Detailed description of touch-up areas and actions taken.

Write something...

Paint finish satisfactory?

- Yes
- No

If 'No', describe the issue with the paint finish.

Write something...

Cleanup of painting supplies completed?

- Yes
- No

Cleanup Items Verified

- Paint cans
- Brushes/Rollers
- Drop cloths
- Tape
- Rags

Contractor Signature (Verification of Completion)

Date of Inspection & Completion

Safety & Environmental Considerations

Important measures to ensure worker and environmental safety during the painting process.

PPE Required (Check all that apply)

- Safety Glasses
- Gloves
- Respirator
- Hearing Protection
- Coveralls

SDS (Safety Data Sheet) Review

Ventilation Rate (CFM)

Enter a number...

Waste Disposal Method

- Recycling
- Hazardous Waste Disposal
- General Waste

Spill Response Plan

Write something...

Last Date of Safety Training Review

Enter date...

Proof of Ventilation System Certification (if applicable)
