

Mining Waste Management Checklist Template

 Show only Checklist

Display Style
Default 

Waste Characterization & Identification

Determine the types and characteristics of waste generated on-site.

Description of Mining Activities & Potential Waste Sources

Write something...

Types of Waste Generated (Select all that apply)

- Rock/Overburden
- Tailings
- Process Chemicals
- Sludges
- Equipment Lubricants
- Construction & Demolition Debris
- Other (Specify in Long Text)

Estimated Volume of Rock/Overburden Generated (m³)

Estimated Volume of Tailings Generated (m³)

Hazardous Waste Determination (Initial Assessment)

- Likely Hazardous
- Potentially Hazardous - Requires Testing
- Non-Hazardous

Supporting Documentation (e.g., Chemical Data Sheets)

 Upload File

Waste Storage & Handling

Ensure proper storage and handling procedures are followed to prevent spills and environmental contamination.

Container Capacity (Gallons)

Container Material (e.g., Polyethylene, Steel)

- Polyethylene
- Steel
- Other

Description of Waste Storage Area

Write something...

Last Container Inspection Date

Enter date...

Secondary Containment Measures

- Concrete Pad
- Drip Trays
- Impermeable Liner
- None

Name of Responsible Personnel

Write something...

GPS Coordinates of Storage Area

 [Set My Current Location](#)

Waste Minimization & Reduction

Evaluate and implement strategies to reduce the volume and toxicity of waste generated.

Current Waste Generation Rate (tons/month)

Enter a number...

Description of Current Waste Minimization Practices

Write something...

Material Substitution Opportunities Assessed?

- Yes
- No
- Pending Assessment

Implemented Waste Reduction Strategies (Select all that apply)

- Recycling Program
- Composting
- Process Optimization
- Material Reuse
- Product Redesign
- Supplier Collaboration

Target Waste Reduction Rate (%)

Enter a number...

Target Date for Achieving Waste Reduction Goal

Enter date...

Permitting & Regulatory Compliance

Verify all necessary permits are obtained and regulations are adhered to.

Applicable Permits Required?

- Yes
- No
- Not Applicable

Copies of Required Permits

 Upload File

Permit Expiration Date (YYYY)

Enter a number...

Date of Last Permit Renewal

Enter date...

Summary of Applicable Regulations

Write something...

Compliance with Federal Regulations (e.g., RCRA)

- Compliant
- Non-Compliant
- Under Review

Compliance with State Regulations?

- Compliant
- Non-Compliant
- Under Review

Waste Transportation & Disposal

Confirm proper transportation and disposal methods are used by licensed contractors.

Disposal Method Selected

- Landfill
- Recycling
- Treatment
- Other

Waste Volume (Cubic Meters)

Transporter Licensed?

Yes

No

Transporter Company Name

Write something...

Transportation Manifest

 Upload File

Date of Transportation

Enter date...

Time of Departure

Enter time...

Disposal Facility Name

Write something...

Spill Prevention & Response

Assess spill prevention measures and emergency response protocols.

Quantity of Absorbent Materials on Hand

Location of Spill Kit(s)

 [Set My Current Location](#)

Date of Last Spill Prevention Training

Time of Last Spill Kit Inspection

Enter time...

Potential Spill Sources Identified?

- Process Water
- Chemical Storage Areas
- Fuel Storage
- Tailings Management Facilities
- None

Description of Spill Prevention Measures Implemented

Write something...

Signature Confirming Spill Prevention Procedures Reviewed

Record Keeping & Reporting

Maintain accurate records and submit required reports to regulatory agencies.

Date of Waste Manifest Generation

Enter date...

Waste Volume (Cubic Meters)

Enter a number...

Waste Weight (Kilograms)

Enter a number...

Description of Waste Materials

Write something...

Disposal Method

- Landfill
- Recycling
- Incineration
- Treatment

Copy of Waste Manifest

 Upload File

Date of Report Submission

Enter date...

Permit Number

Write something...

Employee Training & Awareness

Ensure all employees are properly trained on waste management procedures.

Training Program Outline

Write something...

Topics Covered in Training

- Waste Characterization
- Proper Handling Procedures
- Spill Response
- Regulatory Requirements
- Waste Minimization Techniques
- Personal Protective Equipment (PPE)

Date of Last Training

Enter date...

Number of Employees Trained

Enter a number...

Training Method (e.g., Classroom, Online)

- Classroom
- Online
- Combination

Employee Acknowledgement of Training

Equipment Maintenance & Inspection

Regularly inspect and maintain waste management equipment (e.g., containers, compactors).

Last Equipment Inspection Date

Enter date...

Compactor Cycle Count

Enter a number...

Inspection Notes

Write something...

Equipment Condition

- Excellent
- Good
- Fair
- Poor
- Needs Repair

Equipment Inspection Photos

 Upload File

Container Liner Integrity (Scale of 1-5)

Enter a number...

Next Scheduled Maintenance Date

Enter date...

Closure & Remediation

Plan and implement proper closure procedures and remediation activities when necessary.

Planned Closure Date

Detailed Closure Plan Description

Estimated Cost of Closure (USD)

Supporting Documentation (e.g., Closure Plan, Permits)

 Upload File

Closure Method Selected

- Re-vegetation
- Capping
- Other

Description of Post-Closure Monitoring Plan

Write something...

Date of Final Site Inspection

Enter date...
