

MRP Demand Volatility Response Checklist 2026

Demand Signal Monitoring & Detection

Procedures for identifying significant deviations between forecasted demand and actual customer orders to trigger volatility alerts.

Date of Demand Deviation Detection

Description of Demand Variance

Percentage Deviation from Forecast (%)

Type of Demand Change Detected

- ☐ Unforeseen Demand Spike
- ☐ Significant Demand Drop
- ☐ Seasonal Trend Shift
- ☐ Order Cancellation

Identification of Affected Product Families/SKUs

Impact Assessment & Data Validation

Steps to verify the accuracy of demand spikes or drops and evaluate the impact on existing production schedules and material availability.

Date of Demand Deviation Detected

Enter date...

Description of Demand Anomaly

Write something...

Detailed Impact Analysis on Existing Work Orders

Write something...

Percentage Deviation from Forecast (%)

Affected Product Category

- ☐ Raw Materials
- ☐ Sub-assemblies
- ☐ Finished Goods
- ☐ Packaging Materials

Identified Risk Areas

- ☐ Stockout Risk
- ☐ Excess Inventory Risk
- ☐ Production Bottleneck
- ☐ Increased Expedited Shipping Costs

Validator Approval Signature

MRP Parameter Recalibration

Protocol for adjusting safety stock levels, lead times, and order quantities in response to identified demand shifts.

Primary Parameter to Adjust

- ☐ Safety Stock Levels
- ☐ Reorder Point (ROP)
- ☐ Lead Time Settings
- ☐ Lot Size / Batch Size
- ☐ Demand Forecast Multiplier

New Adjusted Value

Enter a number...

Reason for Parameter Change

Write something...

Effective Date of Change

Enter date...

Affected Material Groups

- ☐ Raw Materials
- ☐ Sub-assemblies
- ☐ Finished Goods
- ☐ Packaging Materials

MRP Manager Approval

Supply Chain & Capacity Re-alignment

Actions required to coordinate with procurement and production teams to adjust work orders and vendor deliveries.

Immediate Actions Required

- ☐ Increase Production Shift Hours
- ☐ Authorize Expedited Shipping
- ☐ Subcontracting to External Vendors
- ☐ Reallocate Raw Materials from Other Orders
- ☐ Delay Non-Critical Work Orders

Procurement Expediting Notes

Revised Production Completion Deadline

Additional Capacity Requirement (Units)

Updated Production Schedule Attachment

 Upload File

Supply Chain Manager Approval

Communication & Stakeholder Management

Standardized workflow for notifying sales, production, and logistics departments regarding changes in fulfillment capabilities.

Stakeholders Notified

- ☐ Production Planning Team
- ☐ Procurement/Purchasing Department
- ☐ Sales and Account Management
- ☐ Warehouse and Logistics
- ☐ Executive Leadership

Communication Channel Used
