

Paving Material Placement Checklist

Pre-Placement Preparation

Tasks completed before paving material application, including site conditions and base preparation.

Site Preparation Start Date

Description of Existing Site Conditions (soil, vegetation, utilities)

Existing Subgrade Elevation (if applicable)

Utility Location Verification Status

- Verified & Marked
- Verification Pending
- Verification Complete - No Utilities Found

Site Survey/As-Built Drawings

[Upload File](#)

Environmental Permits Obtained?

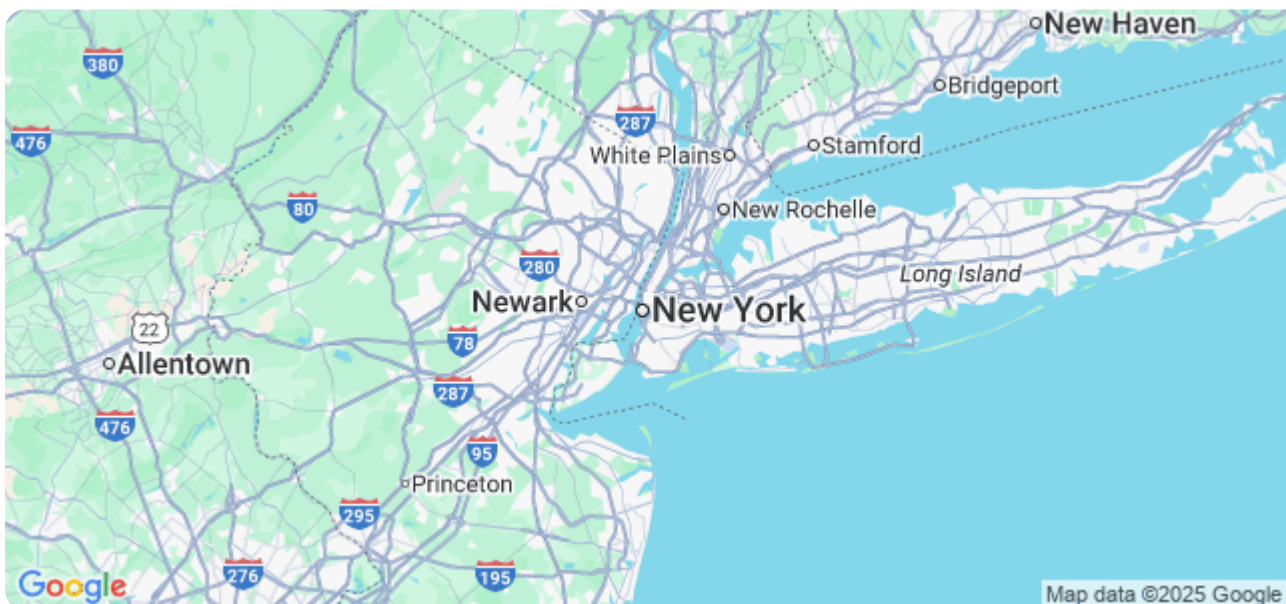

- Yes
- No
- Pending

Notes on potential site hazards or challenges

Write something...

Location of Key Site Features (e.g., survey markers, utility lines)

[Set My Current Location](#)

Material Delivery and Storage

Ensuring proper material handling, protection from the elements, and stock management.

Material Delivery Date

Enter date...

Quantity Delivered (e.g., tons, cubic yards)

Enter a number...

Material Type Received

- Asphalt
- Concrete
- Pavers
- Gravel
- Other (Specify)

Material Description/Lot Number (if applicable)

Write something...

Material Condition Upon Arrival

- Excellent
- Good
- Fair
- Poor
- Unacceptable

Storage Location

Write something...

Protection from Elements?

- Yes - Covered
- No - Exposed
- Partially Covered

Subgrade/Base Course Inspection

Verification of subgrade/base course compaction, grade, and material suitability.

Subgrade/Base Course Depth (inches)

Enter a number...

Moisture Content (%)

Enter a number...

Compaction Density (%)

Enter a number...

Base Material Type

- Crushed Aggregate
- Gravel
- Stabilized Base
- Other - Specify

Notes on Base Course Condition

Write something...

Gradation Test Results Conform to Specs?

- Yes
- No
- Not Tested

Upload Base Course Test Results (e.g., Proctor Test)

 Upload File

Paving Material Quality Control

Verification of paving material characteristics according to specifications.

Material Lot Number

Enter a number...

Material Type (e.g., Asphalt, Concrete, Pavers)

- Asphalt
- Concrete
- Pavers
- Other

Temperature (Initial)

Enter a number...

Gradation Test Results (e.g., % Passing #200)

Enter a number...

Density Test Results

Enter a number...

Mix Design Compliance

- Compliant
- Non-Compliant

Comments/Observations (regarding material quality)

Write something...

Upload Quality Control Test Reports

 Upload File

Material Acceptance

- Accepted
- Rejected

Placement & Spreading

Tasks related to the application and distribution of the paving material.

Initial Material Depth (inches)

Enter a number...

Spread Rate (tons/yard)

Enter a number...

Spreading Equipment Used

- Paver
- Wheel Loader & Rake
- Other (Specify)

Notes on Spreading Technique (e.g., overlaps, adjustments)

Write something...

Material Uniformity?

Yes

No

Partially

Description of any material segregation observed

Write something...

Average Spread Width (feet)

Enter a number...

Any adjustments made to spreading process. Explain why.

Write something...

Compaction

Verification of proper compaction techniques and density achieved.

Initial Roller Pass Count

Enter a number...

Final Roller Pass Count

Enter a number...

Compaction Density (%)

Enter a number...

Moisture Content (%)

Enter a number...

Roller Type Used

- Smooth Drum
- Padded Foot
- Rubber Tired
- Other (Specify)

Compaction Procedure Notes (e.g., roller speed, vibration settings)

Write something...

Compaction Density Test Results (e.g., Proctor Test)

 Upload File

Compaction Acceptable?

- Yes
- No

If not acceptable, corrective actions taken

Write something...

Jointing & Sealing (if applicable)

Tasks specific to joint construction and sealant application.

Joint Type (if applicable)

- Control Joints
- Expansion Joints
- Construction Joints
- None

Joint Spacing (inches)

Enter a number...

Joint Width (inches)

Enter a number...

Joint Preparation Notes (cleaning, sawing, etc.)

Write something...

Sealant Type (if applicable)

- Hot Pour
- Cold Pour
- Self-Leveling
- None

Sealant Depth (inches)

Enter a number...

Sealant Application Notes (temperature, weather conditions)

Write something...

Sealant Expiration Date

Enter date...

Sealant Applicator Signature

Finishing & Cleanup

Final shaping, leveling, and site cleanup after paving material placement.

Surface Smoothness Deviation (inches)

Enter a number...

Surface Texture Achieved (Match Specification?)

- Yes
- No
- Not Applicable

Describe any deviations from specified finish and corrective actions taken.

Write something...

Debris Removed From Site?

- Loose Paving Material
- Excess Sealant
- Tools & Equipment
- Other (Specify in LONG_TEXT)

Specify other debris removed (if 'Other' selected above).

Write something...

Area Marked/Protected?

- Yes
- No

Upload Photos of Final Surface Condition.

 Upload File

Weather Conditions During Finishing

Write something...

Documentation & Sign-off

Record keeping and approval of the completed paving material placement.

Placement Date

Enter date...

Placement Start Time

Placement End Time

Ambient Temperature (°C/°F)

Enter a number...

Pavement Temperature (°C/°F)

Enter a number...

Weather Conditions During Placement

Write something...

Acceptance Criteria Met?

Yes

No

Remarks/Comments (if applicable)

Write something...

Placement Supervisor Signature
