

## **Warehouse WMS Integration Checklist**

## **Project Planning & Scope Definition**

Initial planning and defining the scope of the WMS integration project.

Project Goals & Objectives	
Write something	
Estimated Project Budget	
Enter a number	
Project Start Date	
Enter date	
Projected Completion Date	
Enter date	
Integration Approach (Big Bang vs. Phased)	
☐ Big Bang ☐ Phased	

Write something		
Scope Exclusions (Wha	at's not included)	
Write something		
	Transformation	
pping data fields betweer	n systems and defining transformation rules.	
Source System Field Na	ame	
Write something		
WMS Target Field Name		
WMS Target Field Name Write something		
Write something		
Write something  Data Type Conversion F		
Write something  Data Type Conversion F  Enter a number	-actor (if applicable)	
Write something  Data Type Conversion F	-actor (if applicable)	

Description of Transformation Logic (if applicable)	
Write something	
Data Validation Rules Applied?	
Yes	
No	
Description of Data Validation Rules	
Write something	
Data Mapping Document (e.g., Excel)	
♣ Upload File	
System Connectivity & APIs	
/erifying connections, APIs, and data transfer protocols.	
API Version Number	
Enter a number	

Connectivity Method  REST API  Message Queue (e.g., RabbitMQ)  Direct Database Connection	
API Endpoint URL	
Write something	
Port Number	
Enter a number	
Authentication Method (e.g., API Key, OAuth)  Write something	
Write something  Last Connectivity Test Date	
Write something	

## **User Access & Permissions**

systems.	
WMS User Role	
Administrator	
☐ Warehouse Manager	
Picker	
Packer	
Receiver	
Maximum Order Quantity Allowed	
Enter a number	
Authorized System Access (select all that apply)  Inventory Management Order Processing Reporting Dashboard Shipping Module	
Access Review Date	
Enter date	
Special Access Notes/Justification	
Write something	

Setting up user accounts, roles, and permissions within both the WMS and integrated

IWO-I actor	Authentication Enabled?
Yes	
☐ No	
esting &	& Validation
	e testing of data flow and functionality across all integrated systems.
Number of	Successful Data Transfers
Enter a num	ber
Integration	Order Status (Successful, Partial, Failed)
Successfu	I
Partial	
Failed	
Detailed Err	ror Log Description (if applicable)
Write somet	hing
Number of	Discrepancies Found
Enter a num	
Linter a num	
Litter a fluir	
	t Successful Integration Pun
	t Successful Integration Run

Functional Areas Tested (Receiving, Picking, Shipping, Inventory)  Receiving Picking Shipping Inventory
Overall Test Result (Pass, Fail, Blocked)  Pass Fail Blocked
Training & Documentation Ensuring users are trained on new processes and documentation is available.  Number of Users Trained  Enter a number
Summary of Training Content  Write something
Training Materials (PDF, PPT)  Upload File

Topics Covered in Training  Receiving Putaway Picking Shipping Inventory Management Reporting  Name of Trainer  Write something  Feedback from Training Sessions  Write something  O-Live & Support anning for the go-live process and post-implementation support.	Enter date	
Picking Shipping Inventory Management Reporting  Name of Trainer  Write something  Feedback from Training Sessions  Write something  O-Live & Support anning for the go-live process and post-implementation support.	Topics Covered in Training	
Picking Shipping Inventory Management Reporting  Name of Trainer  Write something  Feedback from Training Sessions  Write something  O-Live & Support  anning for the go-live process and post-implementation support.	Receiving
